What is One Asia ?

SDA

TDA

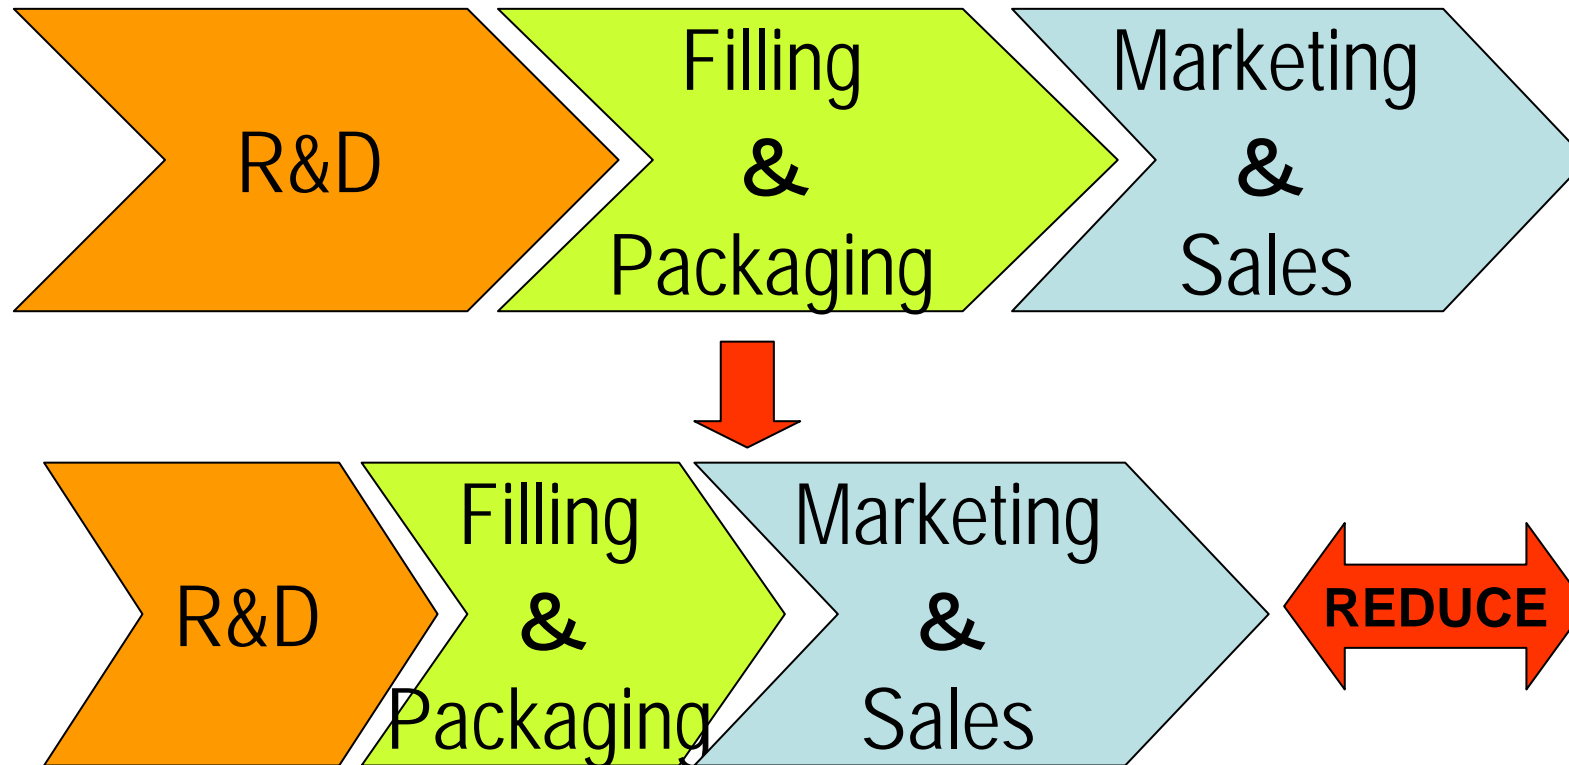

JDA

PAX

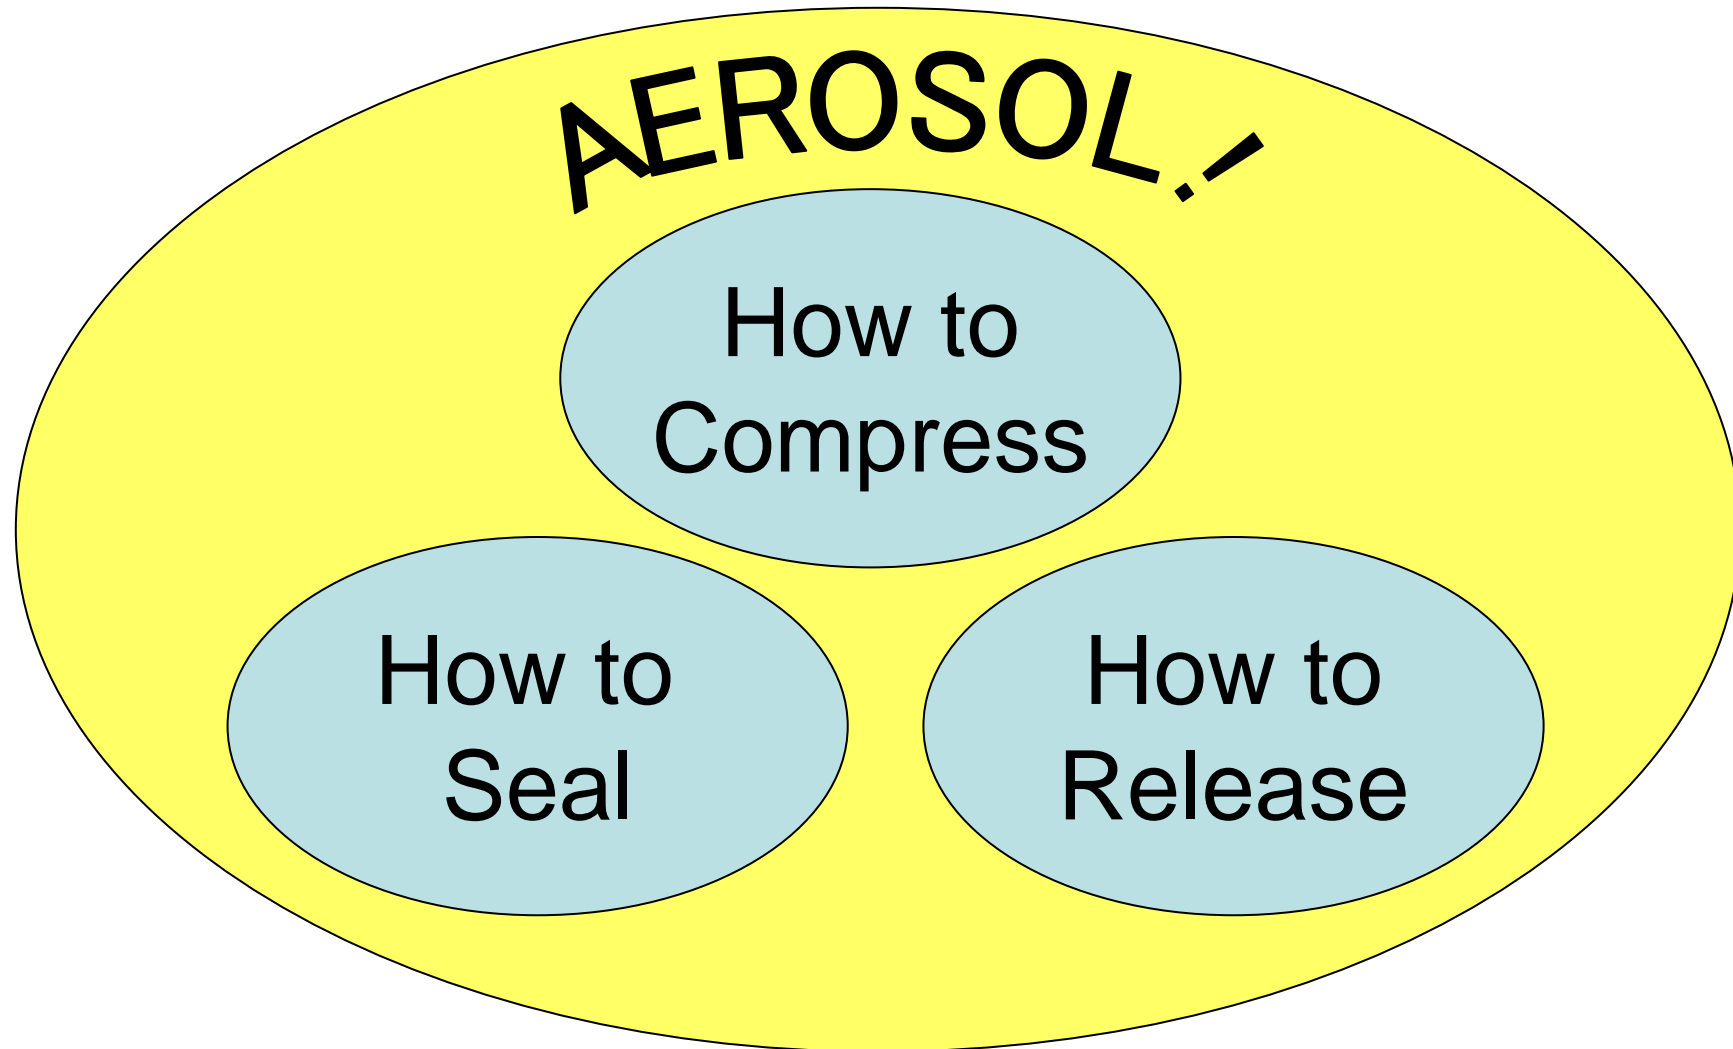

What is our Strength ?

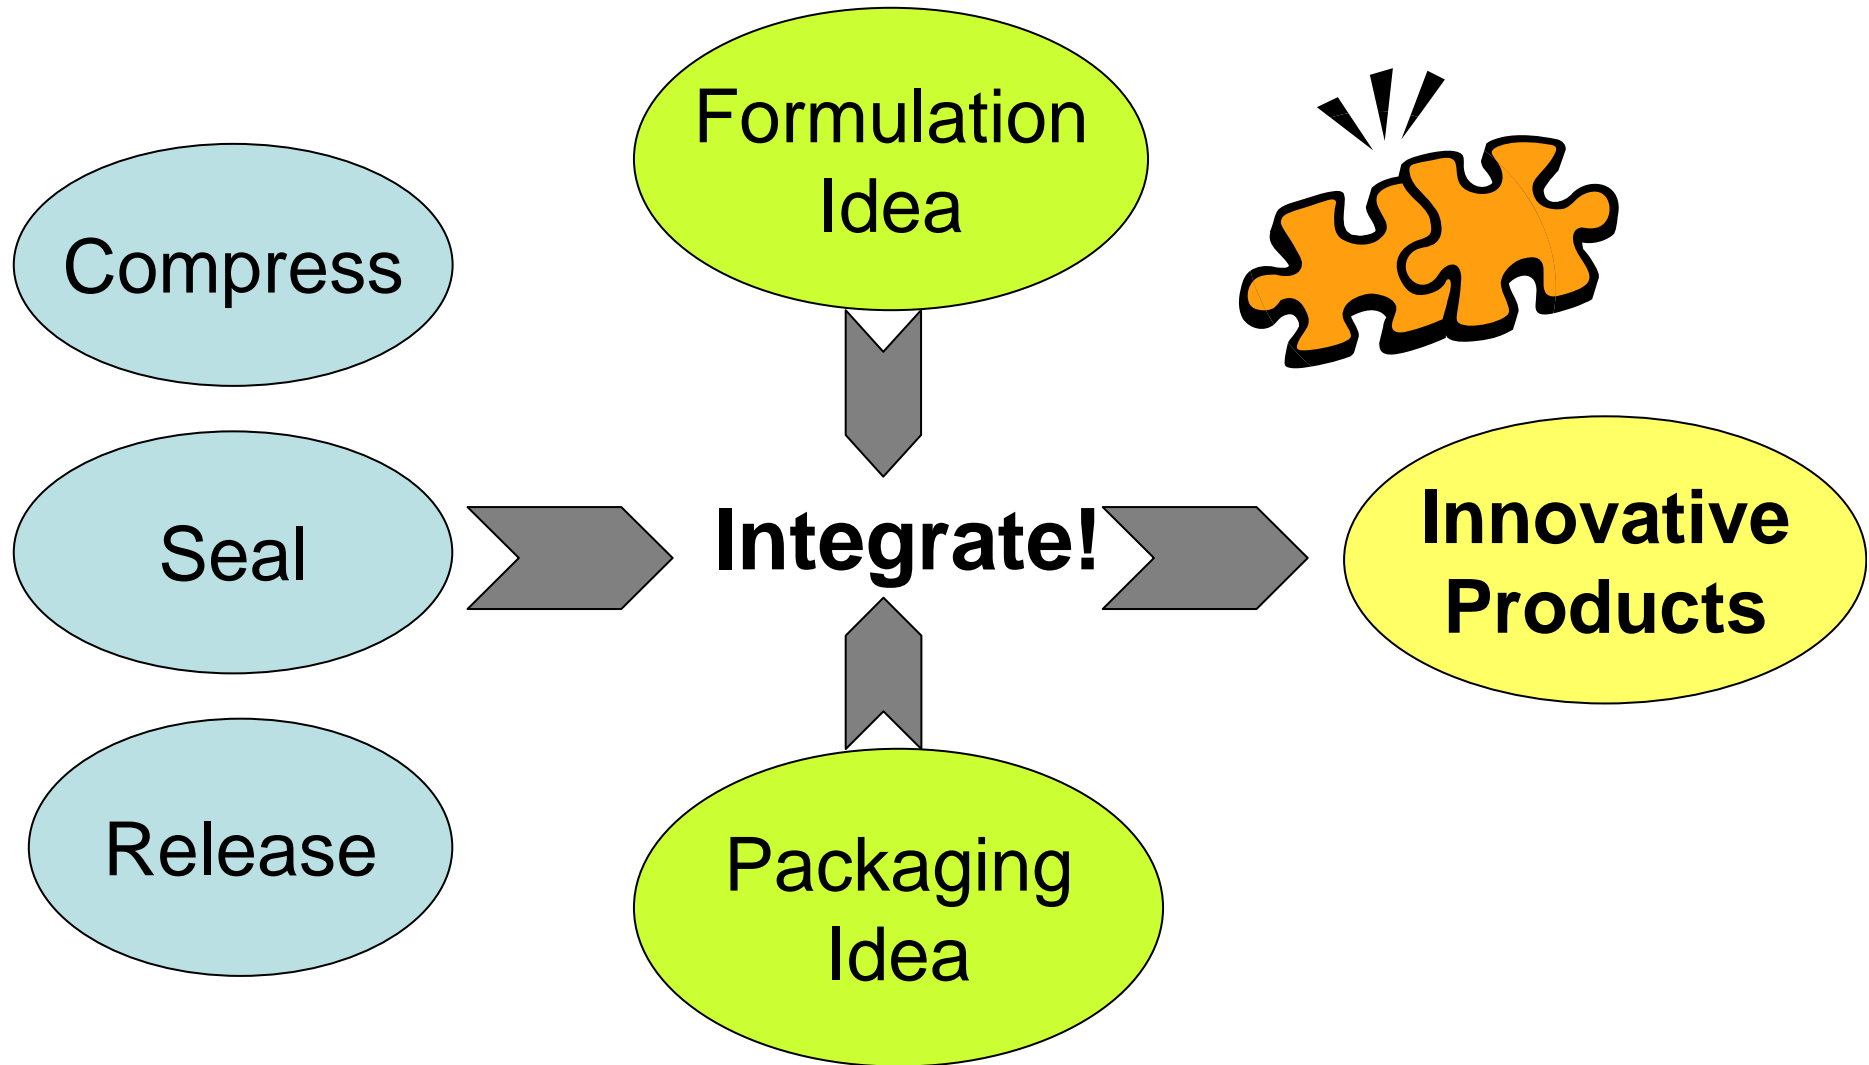

Create value through innovation

Shorten the value chain by technical support

What is Core Aerosol Technologies ?

What is an Innovative Product ?

Innovative Product 1

Crackling Foam

Features

Crackling sound

Cool feeling

Dry feeling

Application examples

Deodorants

Skin Lotions

Hair tonics

Innovative Product 1

Crackling Foam

Concentrate

Innovative Product 2

Sorbet Spray

Features

Sorbet-like ice

Moderate cooling

Application examples

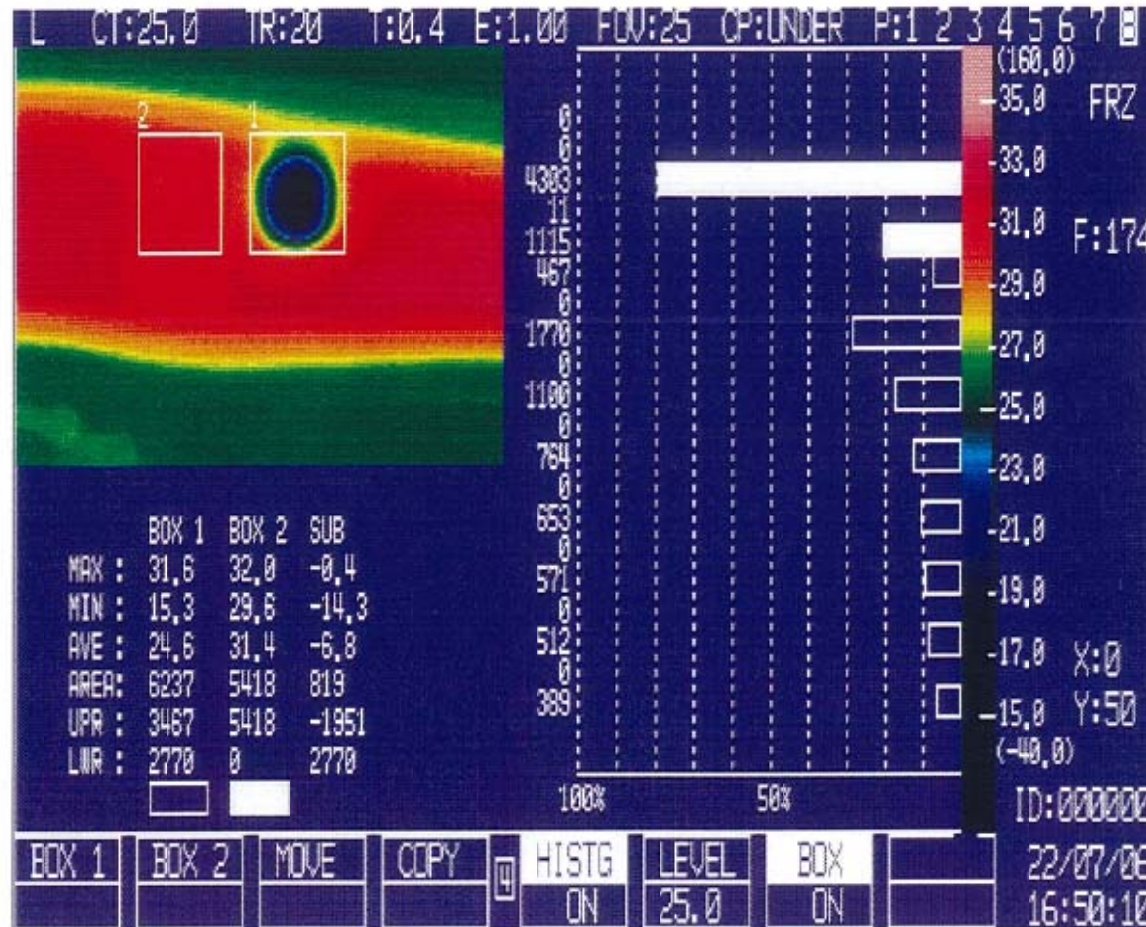

Skin lotions

Astringents

Sunburn care products

Sorbet Spray

Innovative Product 3

Bouncy Foam

Features

Very stable and bouncy

Non-sticky dry feeling

Applications examples

Hair waxes

Bath foams (fragrance)

Toys

Innovative Product 4

Cream Foam

Features

Creamy and glossy

Soft feeling on the skin

Applications

Hair treatments

Hair waxes

Massage creams

Innovative Product 5 Oil Foam

Features

Waterless foam

Soft feeling on the skin

Liquid crystal from
lamella-structure

Applications

Cleansing oils

Baby oils

Massage oils

Innovative Product 6

PET Aerosol

Features

Transparency

Corrosion resistance

Applications

Hair-color products

Many other purposes

Innovative Product 7

UCB

Features

Ecological advantages

User friendliness

Cost effectiveness

Application examples

Creams, gels, mists, pastes

Hair-color products

Body mists

Innovative Product 7

UCB

Innovative Product 8

Soft Mist

Features

Wide spray spread

Gentle spray sound

Applications

Face mists

Body mists

Innovative Product 8

Soft Mist

Water only

Soft mist formula

Innovative Product 9

Dual Dispensing System

Features

- Mixes two contents
- Easy to use

Application examples

- Hair-color products
- Vitamin products
- Urethane foams

Innovative Product 9

Dual Dispensing System

Innovative Product 10

Compact Aerosol

Features

Ecologically friendly (Reduce CFP)

Easy to handle

Application examples

Insecticides

Room fragrances

Deodorants

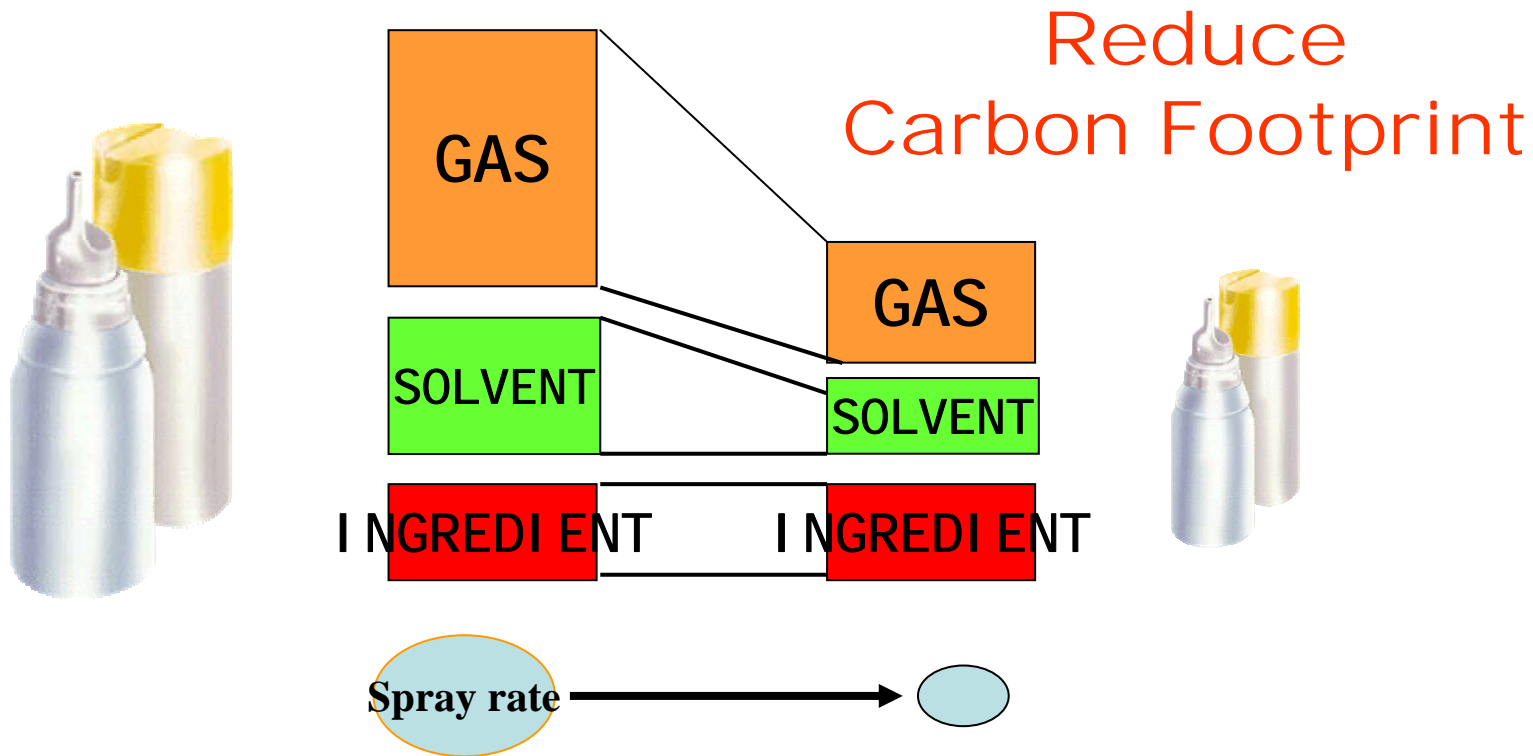

Innovative Product 10

Compact Aerosol

Current Aerosol

Compact Aerosol

Innovative Products

Conclusion

- Aerosol technologies have three core functions:
Compress, Seal, Release
- Integrate both formulation and packaging ideas for innovative products.
- Innovative products are a driving force in the aerosol market.
- One Asia Network shorten the value chain through innovative products.

Thank you very much !
